DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-4 are allowed since certain key features of the claimed invention are not taught or fairly suggested by prior art. **In claim 1**, “resist film divided for each picture element and having wrinkle-form surface ruggedness, which includes convex portions having a continuous linear or a curved shape and being arranged periodically when viewed in a direction perpendicular to one of the pair of substrate; and reflection electrodes formed on the resist film, having ruggedness following the ruggedness of the resist film, and electrically connected to source electrodes of the thin-film transistors”. The closest prior art Yamanaka et al. (6,452,653 B1) teach a reflector comprises a substrate including a plurality of projecting and depressed structures which are groups of column portion are composed into plural groups ... a light reflecting thin film provided over the projecting and depressed, allows incident light to be scattered and reflected, and the light reflecting thin film formed on the resin layer, however, singularly or in combination with other prior art, fail to anticipate or render the above underlined limitations obvious.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
